

Crane Building Services and Utilities Gender Pay Report - 2024

At Crane Building Services and Utilities, we are proud of our values driven culture. We value our associates and the contribution they make. Respect and equality are at the heart of our organisation and that includes the way we pay and reward all our associates.

The report below relates to the period ending April 2024 and includes the following data points:

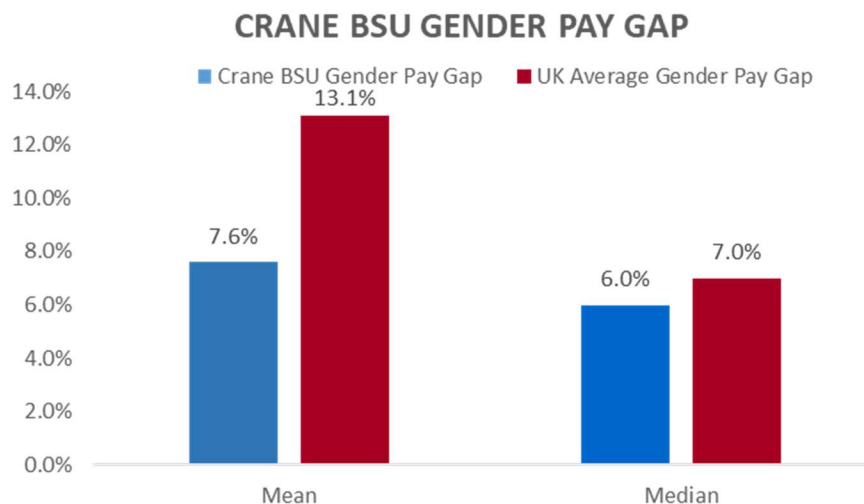

- Mean & Median Gender Pay Gap in hourly pay
- Mean & Median Gender Bonus Gap
- Proportion of men and women who receive a bonus
- Distribution of men and women across pay quartiles

The Gender Pay Gap is not the same as Equal Pay. The Equal Pay Act of 1970 deals with pay differences between men and women who carry out like for like work, work of equal value or work rated as equal. Having reviewed our data, we can confidently say that we continue to pay men and women equally for the same work. We have a working environment where there are equal opportunities for all our associates, so they can fulfil their potential and contribute to the success of our business, irrespective of gender.

The Gender Pay Gap shows the difference between the mean (average) and median (mid-point) hourly earnings and bonuses of male and female associates, expressed as a percentage of male associate's earnings' or bonus. Various factors influence the gap such as demographics of the associates and the type of roles men and women undertake. The Gender Pay Gap does not take into account experience, work location, or job role.

Gender Pay Gap

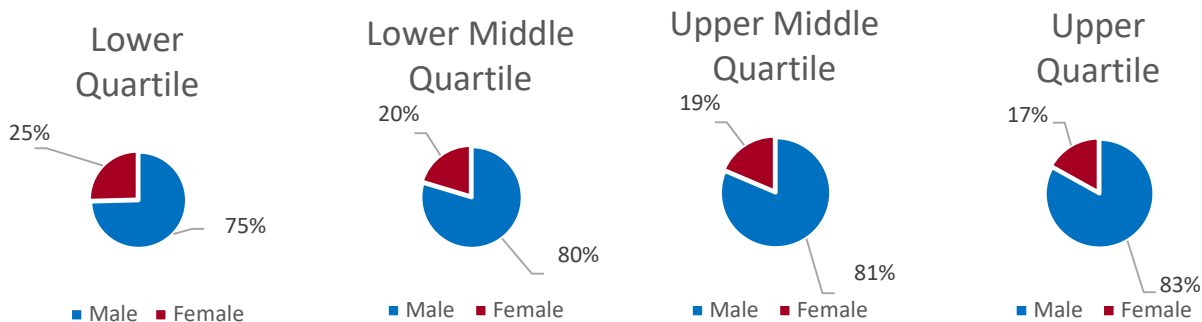

The chart below shows our Gender Pay Gap. In Crane BSU, based on the mean average, women's hourly pay is 7.6% less than that of men and 6.0% less based on the median average. This compares to the UK averages of 13.1% and 7.0% respectively [Gender pay gap in the UK - Office for National Statistics \(ons.gov.uk\)](https://www.ons.gov.uk/gender-pay-gap)

Our data shows a Gender Pay Gap in favour of men. At Crane BSU we have a clear and common approach to pay and compensation. We pay associates equally for the same or equivalent work, regardless of gender, and therefore are confident that the Gender Pay Gap does not stem from paying men and women differently for comparable work. Since the period ending April 2023, our mean pay gap has increased from 7.2% to 7.6% and our median gap reduced from 6.7% to 6.0%.

Gender Split by Pay Quartile

At Crane BSU the upper two quartiles are heavily populated by males in leadership, engineering and sales roles, which is also not uncommon across the UK engineering and manufacturing sector. We see more gender diversity in lower paid positions and this is something that we continue to understand and work on.

Gender Bonus Gap

Rewarding our associates is important to us. All of our associates participate in the Crane BSU bonus program, except associates who join in the 4th quarter of any calendar year.

CRANE BSU GENDER BONUS GAP

Crane BSU have a consistent bonus plan based on a percentage of salary and overall company performance. Our mean bonus gap of 34% is driven by senior roles being more heavily populated by males. The median bonus for females is 48% higher than that of males because, relatively speaking, we have a large number of males in lower paid roles that attract lower bonuses.

Our Actions and commitments

- We are proud that we have a diverse and inclusive culture and continually look to build on this.
- We are proud of our values driven culture.
- We ensure we have the right associates in the right roles and that they are rewarded for their skills and contribution.
- We are committed to maintaining equal pay and reward practices.
- We have a robust Intellectual Capital process to drive in house talent development and provide opportunities and support for career progression, irrespective of race, ethnic origin, gender, religion, disability, age and sexual identity.

Accuracy of Report

I can confirm the accuracy of this report.
